

NORTHEASTERN UNIVERSITY, KHOURY COLLEGE OF COMPUTER SCIENCE

CS 6220 Data Mining — Assignment 6

Due: March 29, 2023(100 points)

YOUR NAME
YOUR GIT USERNAME
YOUR E-MAIL

The Google Doc form of this document is available [here](#). Your assignment for this week will be to send us a 2-page project proposal. You can choose the format you want to use, but make sure to include the following information to your document:

1. What problem are you going to be tackling on your project?
2. Why is that an interesting/useful application of data mining?
3. What models/techniques (clustering/classification/regression) are you envisioning to apply?
4. Where are you going to get the data?

To complete your submission, create your project's repository in your own Github namespace, and upload your provide your URL in Gradescope. For example, my Git handle is `kni-neu`, and my project repository would be:

`https://github.com/kni-neu/<project-name>`
